ABSTRACTED-PUB-NO: DE 4213034A

BASIC-ABSTRACT:

The thermometer has an electronic measuring circuit (3) with a display (5), an energy store (2), a voltage monitor (4), a temp. sensor (10) and an acceleration switch (6) mounted on a common circuit board (7). The circuit board and a solar cell (1) are supported by a plastics moulding (8) and inserted in a hermetically sealed transparent vessel (9).

Pref. the solar cell lies on the same side of the thermometer as the display, the solar cell lying above the acceleration switch.

USE/ADVANTAGE - Optimum energy utilisation and high

reliability, for measuring temp. of human or animal patient.
